

Pictures and Text to Assist with Foot-Support Placement

These photos of a C5 show different placements of the foot-support clamp: affixed to the ring or to a frame leg. The C5 is shown with leg extensions and with the leg extensions removed for a lower height. All questions can be discussed with Sal Porretta, by telephone, email or skype. Our skype name: concertdesign - skype is preferred as Sal can explain and show visually.

Placement of foot support clamp on leg of frame. Useful for 22" frame or when leg extensions are removed for lower height. Photos show view from either side.
